

Annual Deaths from Colorectal Cancer in Senate District 40

88

Each year thousands of Californians die from colorectal cancer – a disease that is **preventable, treatable and curable**. In Senate District 40, an average of 88 citizens die unnecessarily each year.

Screening saves lives, and should start at age 50 for those with no family history of the disease. Unfortunately, not everyone knows this, and many more do not have access to screening – **the most cost-effective cancer screening program**.

Anyone can get colorectal cancer, especially those over age 50. Everyone should have access to screening, but not everyone does.

Annual deaths from colorectal cancer among adults 50 years and older (per 100,000)

	DISTRICT 40 (per 100,000)	CALIFORNIA (per 100,000)
Population Average	46.3	58.1
Men	53.8	69.8
Women	40.1	49.7
Non-Hispanic White	58.7	64.0
Black	101.0	95.3
Hispanic	39.0	50.5
Asian/Pacific Islander	57.7	47.7
